

sunsail **JADEN**

SASSUS®

JADEN

The automatically retractable Jaden sunsail, (shade sail), combines advanced technology, daring design and top quality to provide tomorrow's shading solution today.

Controlled by a built-in sensor system, the sunsail can be set to automatically extend in bright sunlight and retract in shady conditions. It will also automatically retract when the wind speed becomes excessive, (50 km/hour).

DESIGN

QUALITY

SASSUS

ADVANTAGES

- Custom designed to meet your requirements.
- High quality stainless steel and aluminium construction.
- Provides shelter from sun and rain.
- Light and wind sensors allow fully automatic operation.
- Resistant to dirt, weather, UV and virtually maintenance free.
- Beautifully designed.

OPERATION

- The sail can be manually operated, and can be set to open to any position.
- Automatic operation is controlled by a built-in light and wind sensor.

STORM PROTECTION

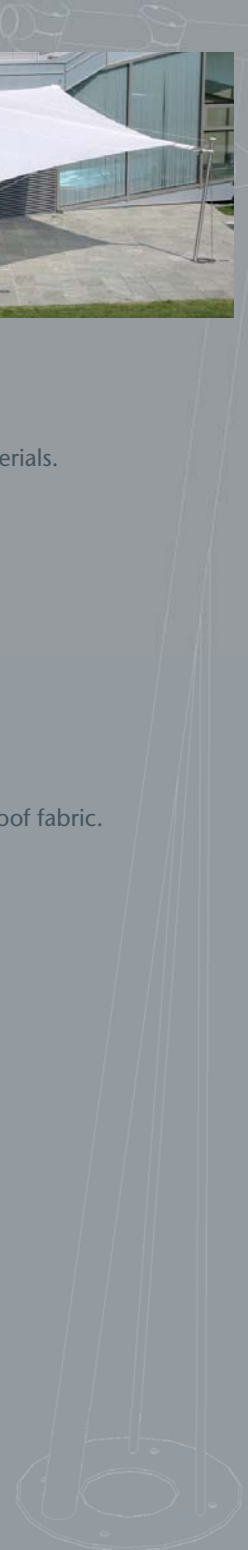

- At wind speeds over 50 km/hour (Beaufort 7), the JADEN sunsail will automatically retract to prevent storm damage.

CONSTRUCTION

- Durable, corrosion and dirt resistant materials.
- Stainless steel supports.
- Powder coated steel mast.
- Low noise motor.

SAIL FABRIC

- Size determined by your requirements.
- Colourfast, dirt and UV resistant waterproof fabric.
- Choice of colours.
- Fire resistant.

JADEN in Detail

Sail geometry: custom cut

Sail Dimensions

The maximum sail area is 50 square metres and to ensure drainage the minimum mast gradient is 12 degrees.

Maximum mast length is 9 metres.

Maximum sail extension is 6.5 metres either side of the mast.
