## Fast Track Modular Roof Glazing & Canopy Systems

24 January 2018

### Introduction

Twinfix are a high quality, safety focused, British manufacturer and installer of roof glazing and canopy systems.

From its original roots as polycarbonate and glazing bar suppliers, Twinfix now offers a full range of glazing products from the original glazing bar range to the non-fragile Multi-Link-Panel which is often incorporated in to a wide variety of canopies, covered walkways and shelters. Working across many sectors, including rail, education, industrial and retail, Twinfix offers a full service from initial enquiry and advice on projects, to design, manufacture and installation.

We pride Ourselves in product development and introducing new roofing and canopy products to the market.

### Learning Aims

- This PowerPoint presentation is classed as Intermediate level, so is appropriate for all. Novices and experienced participants alike will benefit, gaining understanding and comprehension of the subject material.
- It will enable specifiers to make more informed decisions about the products used in overhead glazing situations, including canopies, walkways and covered areas, by having a better understanding of the different products available in the marketplace.

### Topics Covered

- The benefits of multiwall and Georgian wired effect solid polycarbonate sheet used in roof glazing compared with traditional glazing.
- Quick to fit modular roof glazing panel systems.
- Of particular interest is rooflight fragility and the requirements of CDM Regulations. This includes the HSE's recommended drop test ACR[M]001:2014 for testing of roofing assemblies, and covers the performance of various glazing products.
- Sustainability of products and their environmental impact is also discussed.
- The advantages of using pre-assembled roof glazing panels that are manufactured off-site to allow quick installation under possession times.

### Timing

45 minutes, plus questions and answers.

This seminar includes hands on demonstrations of products and encourages audience participation. It is timed to fit easily in to a 'lunchtime' or early evening slot.

Please ring or email us to book your seminar.
