Environmental Policy Statement

Twinfix is a manufacturer, stockist and installer of building products. Our principle activities include the design, manufacture and installation of glazed covered areas and walkways. Other key activities involve stocking, packaging and delivering aluminium glazing systems and polycarbonate sheet products to be installed either by our internal teams or a client's installation team.

We recognise that all products and services generate environmental impacts and we are committed to minimising our negative impacts and improving our environmental performance. We will operate in compliance with all relevant environmental legislation and we will strive to use pollution prevention and environmental best practices in all we do. Twinfix are currently implementing an EMS system in line with the BS8555 framework and this will outline fully Twinfix's environmental objectives and aims.

The Board of Directors is dedicated to the implementation of the EMS and support the following commitments:

- Ensure all waste generated is, where possible, recycled. Additionally, reduce packaging waste by using re-usable packaging.
- Promote efficient use of materials and resources throughout our office and factory by monitoring usage of electricity, raw materials and other resources, particularly those that are non-renewable.
- Promote environmental awareness among our employees and encourage everyone to work in an environmentally responsible manner.
- Communicate our environmental commitment to clients, customers and the public. This policy document will be available on the Twinfix web site. Additional information in relation to the company's environmental objectives will be made available upon completion.
- Strive for continued improvement by setting and regularly reviewing environmental objectives.

The Twinfix Board of Directors and management team is committed to developing and refining our Environmental Management Systems and putting in place best practices. Twinfix are motivated to drive through improvements to our impact on the environment by both ecological and commercial imperatives.

Signed

Sarah Kench
Joint Managing Director
